HDip Data Analytics

This is a post graduate, student driven, online collaboration space for notes and reference material for Python based data analytics and not affiliated with academic institutions.

Click the links to the left for more information on the various topics.

To request collaboration access to the wiki, contact the administrators through the appropriate slack channels.

- HDipDataAnalytics.slack.com

If you are not on slack contact one of the wiki authors directly for instructions to join.

We need your help to keep up with the updates on the wiki, please join in and help make this collaboration attempt a success.

There are multiple attempts to breach the security of the wiki at the moment by bots creating registration requests. This breaks the mail loop and clutters the user base and login admin, so registration is disabled now and needs to be manually done by the admins. So please contact the admin via our slack channel to register.
